

Hello, first off all, thx for using stati for shoutcast 2.x (sFs)

| | |
|--------------------|---|
| sFs Version: | 0.5.4b |
| Manual Version: | 1.0.0 |
| Author: | R. Malik |
| Files you can use: | sc_infopage.php sc_status.php show_dj.php set_dj.php |

To install sFs do the following:

1. Unzip sFs_xxxx.zip
2. Copy or upload the folder sFs_xxxx to your webserver
3. Point your browser to http://www.yourdomain.tld/sFs_xxx/sFs_CP/
4. Fill out the required information and hit the save button
5. Edit set_dj.php with the right DJ's. (Optional)

Auto DJ is the name that is displayed on the website instead of autodj. To create those readable names, do the following.

Edit set_dj.php with the following information:

Example:

Old: `<option value="autodj">Auto DJ</option>`

New: `<option value="richard">DJ Richard</option>`.

6. Edit inc_djs.php with the same info as set_dj.php.

```
if ($data == autodj) { $dj='Auto DJ'; }
if ($data == richard) { $dj='DJ Richard'; }
```
7. It should work now. If it is not working properly check out our forum at <http://www.gelderskabaal.nl/forum/>

Twitter button can be set in sc_status.php in the section TWITTER. Create your own button at <https://twitter.com/about/resources/buttons>

All settings can be set in the sFs ControlIP. http://www.yourdomain.tld/sFs_xxx/sFs_CP/

The following options can be set:

| | | |
|----------------------|----------------------------|--|
| \$maintenance | Maintenance | Set maintenance mode |
| \$debug | Debug | Set debug mode. (Experimental) |
| \$donate | Show Donate Button | Turn on/off the donate message |
| \$offlinemes | See sFs_CF | Show message if maintenance is selected |
| \$downmes | See sFs_CF | Show message if the stream is down |
| \$show_password | Show Password in ControlIP | Show password instead of *** on the settings page |
| \$show_stat_all | Show Full Server Stats | Show current, max en peak listeners and show bitrate on the status page |
| \$show_unique | Show Unique Listeners | Show unique listeners on the status page. Only works if \$show_stat_all is set to 1. |
| \$history | Show Song History | Show history on sc_status page if a DJ is selected |
| \$show_stat_avg | Show Summary Stats | Show a summary of info at the status page |
| \$stream_server | How many S.C. do you have? | Select the amount of servers active. (status page) |
| \$stream_server_info | How many S.C. do you have? | Select the amount of servers active. (infopage) |

PLEASE KEEP IN MIND THAT THIS IS A BETA VERSION AND THAT THERE IS A LOT TO BE IMPROVED. Yeah I know, even my english
